Project Organization: Integrating Bootstrap (Front-End) Framework with Web Application

This project adopts the Bootstrap framework recommended project directory structure.

```
 1   <ismp>/                          1  <docs>
 2       bower_components/            2      doc_add.php
 3       dist/                        3      doc_delete.php
 4       js/                          4      doc_edit.php
 5       less/                        5      doc_list.php
 6       pages/                       6      doc_view.php
 7       bower.json                   7  <logs>
 8       index.php                    8      log_add.php
 9       LICENSE                      9      log_delete.php
10       README.md                   10      log_edit.php
                                     11      log_list.php
                                     12      log_view.php
                                     13  <profile>
                                     14      is_add.php
                                     15      is_delete.php
                                     16      is_edit.php
                                     17      is_list.php
                                     18      is_view.php
```
